Certificate of Analysis

Disinfectant Suspension Test Based on BS EN 1276 @ 20°C

Organism	Method	Contact Time	Pass Criteria	(Log Reduction)				Validation
				Clean Conditions		Dirty Conditions		
MRSA (epidemic MRSA-16)	N	5 min	Log 5	>6.6	PASS	>6.6	PASS	PASS

N = Neutralisation method F = Membrane filtration method

Epidemic or EMRSA-16 is a strain of community acquired MRSA regularly isolated from both within community and hospital settings. This clone has also recently been the cause of a major epidemic in Sweden (Ref EPI-News).
